

SORTY LEGAL

Sorty Terms of Service

Last updated June 2026

The short version

Sorty is free, open-source software licensed under the GNU GPL v3.0. You may use, modify, and redistribute it under that license. The App is provided as is, without warranty of any kind. You are responsible for your files and for reviewing suggested changes before applying them.

1. Agreement to Terms

These Terms of Service govern your use of the Sorty macOS application and the [sorty.app website](https://sorty.app), collectively the Service. By downloading, installing, or using the Service, you agree to these Terms and the [Privacy Policy](#). If you do not agree, do not use the Service.

The Service is maintained by the Sorty open-source project and its contributors.

2. License & Open Source

Sorty is free and open-source software licensed under the [GNU General Public License v3.0](#). Under the GPL-3.0, you are free to use the App for any purpose, study how it works, redistribute copies, and distribute modified versions, provided you comply with the GPL-3.0 conditions including keeping source available under the same license.

The full source code is available on [GitHub](#).

3. Acceptable Use

You agree to use the Service lawfully and responsibly. Do not use the App to process files you do not have the right to access, circumvent safety mechanisms for malicious purposes, infringe third-party rights, or transmit unlawful or harmful content through third-party AI providers.

4. Your Files & Content

You retain all rights to the files and content you organize with Sorty. Sorty reads and moves files only on your device and only within folders you explicitly grant access to. The App does not upload file contents unless you explicitly enable Deep Scan with a cloud AI provider.

You are solely responsible for maintaining backups of your data. Sorty offers preview, dry-run modes, and full undo to reduce risk, but you are responsible for reviewing suggested changes before applying them. See

the [Privacy Policy](#) for details on data handling.

5. AI Providers

Sorty integrates with third-party AI providers you select and configure yourself, including [OpenAI](#), [Anthropic](#), Google Gemini, Groq, OpenRouter, GitHub Copilot, [Ollama](#), and [Apple Foundation Models](#). When you use a cloud provider, your use is also subject to that provider's terms of service and acceptable-use policies.

For on-device processing, you may use [Ollama](#) or [Apple Foundation Models](#), which keep processing on your Mac.

6. Releases & Signing

Pre-built Sorty releases are distributed as ZIP archives through [GitHub releases](#) and are not code-signed with an Apple Developer certificate. macOS may display a security warning on first launch. You may remove the quarantine attribute or [build from source](#) if you prefer complete control.

We do not guarantee that pre-built binaries will pass Apple notarization or Gatekeeper checks. You are responsible for verifying downloaded artifacts and trusting the source from which you obtained them.

7. Disclaimer of Warranties

The Service is provided as is and as available, without warranties of any kind, whether express or implied. We do not warrant that the App will be error-free, uninterrupted, secure, or that AI suggestions will be accurate or appropriate for your needs.

AI-generated folder structures and file classifications are suggestions only. Always review them before applying.

8. Limitation of Liability

To the maximum extent permitted by applicable law, neither Sorty nor its contributors shall be liable for indirect, incidental, special, consequential, or punitive damages, or any loss of data, arising out of or in connection with use of the Service.

9. Third-Party Services

The Service interacts with third-party components and services, including the [Sparkle update framework](#), your chosen AI providers, and [GitHub releases](#). We are not responsible for the availability, accuracy, or practices of these third parties. Your use of them is subject to their respective terms and policies.

10. Changes to These Terms

We may revise these Terms from time to time. Material changes will be reflected in the [Changelog](#) and via in-app notifications where appropriate. Continued use of the Service after changes constitutes acceptance of the updated Terms.

11. Contact

For questions about these Terms, open a [GitHub Discussion](#). For security-related matters, use GitHub private vulnerability reporting as described in [SECURITY.md](#).
